Siva Ganesh Golla

Java Full Stack Developer

Tampa, FL, USA | gsg1499@gmail.com | linkedin.com/in/ganeshg7 | github.com/sivaganesh1407

PROFESSIONAL SUMMARY

Java Full Stack Developer with 5+ years of experience building scalable enterprise applications. Proficient in **Java**, **Spring Boot**, **Microservices**, **REST APIs**, **React**, **Docker**, **Kubernetes**, and **AWS**. Delivered backend services, cloud-native systems, and modern web interfaces for financial services, restaurant tech, and energy sectors. AWS Certified DevOps Engineer – Professional and Solutions Architect – Associate. Strong focus on system design, API development, and CI/CD.

TECHNICAL SKILLS

Backend: Java, Java 17, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Microservices, RESTful APIs, Event-Driven Architecture | **Messaging & Data:** Redis, RabbitMQ, Kafka, ETL Pipelines, Data Integration, Data Validation, SQL Optimization | **Frontend:** React, Angular 17, JavaScript, HTML5, CSS3 | **Cloud & DevOps:** AWS (ECS, EC2, ECR), Docker, Kubernetes, CI/CD, Bitbucket Pipelines, Jenkins | **Databases:** Oracle, SQL, MySQL, PostgreSQL, MongoDB | **Other:** Agile, Git, Data Workflows, GitHub Copilot

PROFESSIONAL EXPERIENCE

Full Stack Engineer, Mad Mobile — Nov 2025 – Present

- Modernized legacy Spring MVC systems by designing and developing scalable **Java 17 / Spring Boot microservices** to improve performance, reliability, and deployment flexibility.
- Built **event-driven architectures** using **Redis, RabbitMQ, and Kafka** for asynchronous processing, real-time communication, and distributed system scalability.
- Developed end-to-end **RESTful APIs**, secured services with **Spring Security**, and optimized data workflows with **Oracle, SQL, and MongoDB** for high-volume applications.
- Deployed and managed **cloud-native applications** on **AWS ECS, EC2, and ECR** using **Docker and Kubernetes** for containerization, orchestration, and production resilience.
- Implemented **CI/CD pipelines** using **Bitbucket Pipelines** to automate builds, tests, deployments, and versioning across dev, QA, staging, and production.
- Delivered full-stack features using **Angular 17 / React** and used AI-powered tools (e.g., **GitHub Copilot, OpenAI APIs**) to improve engineering productivity.

Java Full Stack Developer, Corebridge Financial — Feb 2025 – Oct 2025

- Developed and maintained **Java / Spring Boot applications** for retirement, life insurance, and asset management workflows, supporting secure data processing and business logic.
- Built **RESTful APIs** for customer portals, agent dashboards, and internal admin systems, enabling reliable data exchange between front-end and back-end services.

Created user-friendly interfaces for customer portals, agent dashboards, and internal administrative systems using **HTML, CSS, and JavaScript frameworks (e.g., Angular / React)**.

Implemented input validation and data checks on forms and user interactions to ensure data accuracy and consistency across financial workflows.

Collaborated with cross-functional teams in an **Agile environment** to deliver features across development, QA, and production for financial services applications.

Java Full Stack Developer, ConocoPhillips Feb 2024 – Dec 2024

Implemented server-side logic using **Java** and frameworks like **Spring Boot** to handle complex company calculations, data processing, and transactions.

Designed and developed **RESTful APIs** for data exchange between front-end and back-end components.

Delivered full-stack features; built backend REST API with **Java 11, Spring Boot, and Spring Data JPA** for portfolio and asset tracking.

System Engineer, Infosys Jun 2021 – Jun 2022

Developed **backend data services** to support vehicle manufacturing and supply chain analytics systems used by Mercedes-Benz engineering teams.

Built **ETL pipelines** integrating vehicle production data, dealer management systems, and enterprise operational databases.

Designed data workflows to process automotive manufacturing metrics, vehicle configuration data, and production line performance reports.

Optimized **SQL queries** used in automotive analytics dashboards that monitor vehicle production efficiency and logistics performance.

Implemented data validation and transformation processes to ensure accurate integration of vehicle inventory and distribution data.

Supported enterprise systems that process dealer network sales data and vehicle delivery tracking across regional markets.

Participated in **Agile** development cycles delivering data integration features for automotive operations and engineering teams.

Assisted in troubleshooting production data pipelines supporting vehicle manufacturing and supply chain reporting systems.

Associate System Engineer, Elder Pharmaceuticals Jun 2019 – May 2021

Developed **data integration processes** to manage drug manufacturing, batch production, and pharmaceutical inventory data used in internal reporting systems.

Built **ETL workflows** to consolidate laboratory testing data and quality control results from multiple pharmaceutical systems into centralized databases.

Supported data pipelines used for pharmaceutical product lifecycle management, ensuring accurate tracking of medicine batches and manufacturing records.

Implemented **data validation logic** to maintain accuracy of clinical and drug safety datasets used for regulatory and compliance reporting.

Assisted in integrating sales and distribution data for pharmaceutical products, helping track medicine supply across distributors and healthcare providers.

Created **SQL-based reports** supporting drug production monitoring, inventory tracking, and product performance analytics.

tracking, and product performance analytics.

Supported data systems used for pharmacovigilance and adverse event reporting, helping maintain reliable pharmaceutical safety data.

Collaborated with quality assurance teams to ensure data consistency for pharmaceutical manufacturing and compliance audits.

CERTIFICATIONS

AWS Certified DevOps Engineer – Professional (March 2025 – March 2027)

AWS Certified Solutions Architect – Associate (February 2025 – February 2028)

EDUCATION

Master's Degree, Indiana Wesleyan University

Grade: 3.45/5. Coursework: Information Systems Management, IT Infrastructure, Database Systems, Cloud Computing, Cybersecurity Fundamentals. Participated in technology-focused
