Siva Ganesh Golla

Java Full Stack Engineer | Spring Boot | React | Angular | AWS
gsg1499@gmail.com • linkedin.com/in/ganeshg7 • github.com/sivaganesh1407

PROFESSIONAL SUMMARY

Java Full Stack Engineer with 5+ years delivering production systems across the SDLC: Java and Spring Boot microservices, REST APIs, React and Angular, and cloud delivery on AWS, Docker, and Kubernetes. Current focus includes restaurant technology and POS-related platforms; prior domains include financial services (retirement, insurance, asset management), energy, automotive, and regulated enterprise environments. Deep experience with OAuth2, JWT, RBAC (Spring Security), Kafka and RabbitMQ, CI/CD (Jenkins, Bitbucket), automated testing (JUnit, Mockito), and observability (Prometheus, Grafana). AWS Certified DevOps Engineer – Professional, AWS Solutions Architect – Associate; HashiCorp Terraform Associate. Collaborates in Agile teams with product, QA, and platform engineering.

TECHNICAL SKILLS

Frontend: React, Angular, responsive UI, REST clients | Backend: Java 11/17, Spring Boot, microservices, REST APIs, Spring Security (OAuth2, JWT, RBAC), Hibernate/JPA, Node.js | Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, ECS), Docker, Kubernetes, Terraform, Jenkins, Bitbucket, CI/CD, infrastructure as code | Data & messaging: Oracle, MySQL, PostgreSQL, MongoDB, Redis, Kafka, RabbitMQ | Quality: JUnit, Mockito, Prometheus, Grafana

PROFESSIONAL EXPERIENCE

Java Full Stack Engineer – Mad Mobile

Nov 2025 – Present

- Cut production incidents 40% and deployment time from 2 hours to 15 minutes by leading migration from legacy Spring MVC to Java 17 and Spring Boot microservices for restaurant and POS platform workloads.
- Designed modular microservices for hospitality and restaurant operations—menus, orders, locations, and POS-adjacent flows—with strong availability, maintainability, and performance.
- Processed 10K+ transactions daily at 99.9% uptime on an event-driven stack (Redis, RabbitMQ, Kafka) with retry and circuit breaker patterns for order, payment, and integration events.
- Delivered sub-200ms REST APIs with Spring Security and OAuth2 for 500+ concurrent users across restaurant staff and customer experiences, with Angular and React UIs monitored through Prometheus and Grafana.
- Automated regression and service-level testing with JUnit and Mockito for POS and restaurant-domain services, tying coverage to release gates and defect KPIs.
- Partnered with DevOps to standardize Jenkins and Bitbucket CI/CD (build, scan, deploy) for repeatable releases of restaurant platform services to cloud environments.

Java Full Stack Engineer – Corebridge Financial

Feb 2025 – Oct 2025

- Built Java and Spring Boot services and Hibernate-backed REST APIs for retirement, life insurance, and asset management across customer and agent portals.
- Reduced data errors 90% and improved API response time 25% by shipping Angular and React UIs with OAuth2, JWT, and Redis-backed session management.
- Released Docker and Kubernetes workloads on AWS (EC2, S3, RDS, Lambda) with DevOps for secure financial services operations.
- Shipped 8+ features on schedule—including policy management and claims processing—through Agile collaboration with QA and Product on requirements and acceptance criteria.
- Produced technical specifications and API contracts for financial workflows and supported architecture and compliance reviews.
- Applied secure coding with Spring Security (validation, least-privilege patterns) and JUnit and Mockito on critical policy and claims paths.
- Tightened CI/CD for cloud deployments to cut manual steps and shorten feedback from test through production.

Java Full Stack Engineer – ConocoPhillips

Feb 2024 – Dec 2024

- Built Java 11, Spring Boot, and Spring Data JPA services for portfolio and asset tracking, supporting 500+ users and 10K+ daily transactions.
- Cut manual reporting time 50% by integrating REST APIs with responsive React dashboards for field and asset operations.
- Automated build-test-deploy with Jenkins and Terraform and ran containerized services on Kubernetes with health checks, readiness probes, and auto-scaling across Oracle and MySQL.
- Authored integration and service documentation that accelerated operations handoffs and cross-team onboarding.
- Stabilized production changes with JUnit and Mockito tests on core services.

System Engineer – Infosys

Jun 2021 – Jun 2022

- Developed Java and Spring Boot REST services for vehicle manufacturing and supply chain analytics with Oracle and PostgreSQL.
- Built ETL pipelines for production, dealer, and logistics data powering analytics and reporting backends.
- Improved SQL performance 30%, reducing dashboard load times for 100+ users on analytics workloads.
- Delivered incrementally in Agile squads with analysts and QA, shipping APIs consumed by operational and reporting teams.

Associate System Engineer – Elder Pharmaceuticals

Jun 2019 – May 2021

- Built Spring Boot and Node.js services and REST APIs for production monitoring and ERP integration on Oracle and PostgreSQL.
- Reduced manual data entry 70% by shipping AngularJS and React dashboards for laboratory, quality control, and inventory workflows.
- Consolidated lab, QC, and inventory data through ETL with validation and SQL-based compliance reporting.
- Automated Jenkins and Maven CI/CD with audit-friendly reporting patterns for regulated operational data.

CERTIFICATIONS

- **AWS Certified DevOps Engineer – Professional** (March 2025 – March 2027)
- **AWS Certified Solutions Architect – Associate** (February 2025 – February 2028)
- **HashiCorp Certified: Terraform Associate** (March 2025 – March 2027)

EDUCATION

Master's Degree, Information Technology Management, Indiana Wesleyan University

Grade: 3.45/5. Coursework: Information Systems Management, Database Systems, Cloud Computing.

Bachelor's, Electrical, Electronics and Communications Engineering, Karunya Institute of Technology and Sciences

Grade: 7.2/10. Coursework: Communication Systems, Embedded Systems, Computer Engineering.

KEY PROJECTS

Retirement Investment Management Platform

- Shipped a full-stack retirement and portfolio app with Spring Boot, JWT with role-based access, and React on AWS and Docker.
- Exposed REST APIs for authentication and portfolio tracking backed by PostgreSQL and Redis.

Smart Restaurant Platform

- Delivered Spring Boot, React, and MySQL flows for menus, orders, inventory, and sales analytics.
- Built REST APIs for orders and inventory sync and a React admin dashboard that cut manual operations 60%.

User Management Service

- Implemented Spring Boot, JPA, and H2 with JWT authentication and RBAC using Spring Security.
- Delivered registration, login, profile, and audit logging endpoints.
